

## Our Professional Staff

*We work hard to maintain an excellent staff to provide the best possible care for your pet. Our staff prides itself on making patient care and customer service our top priorities.*

*David A. Cohen, DVM purchased the hospital in 1985. He is a 1981 graduate of the University of Illinois College of Veterinary Medicine and a member of several professional organizations. Dr. Cohen's goal is to be an advocate for our patients' health and well being, and to educate and involve our clients in a life-long health care plan for their pets.*

*Manny Kanter, DVM joined our practice in 2007. He completed a small animal internship at the University of Illinois College of Veterinary Medicine after graduating from The Ohio State University College of Veterinary Medicine in 2004. Dr. Kanter brings a dedication and compassion for our patients to enhance their health and quality of life.*

## Emergency Services

Please call us at once for any emergency. Care is always available for your pet. Our office number is (847)724-4812. Emergencies during hospital hours are given priority over routine procedures. After-hours emergencies will be referred to:

# Welcome

## Glenview Animal Hospital

*Bringing a New Look to  
Veterinary Medicine*

2400 Waukegan Road  
Glenview, IL 60025  
847-724-4812

*Dedicated to providing  
compassionate & comprehensive  
care for your pet*

## Preventive Health Care

*Prevention is the key to a long and healthy life for your pet. With that in mind, Glenview Animal Hospital emphasizes proactive preventive medicine.*

### Puppy/Kitten Health:

Puppies and kittens require a series of examinations, testing and vaccinations. Our Puppy/Kitten Wellness Program provides everything your new family member needs to get off to a healthy start in life.

### Wellness Exams:

After completing a yearly or semi-annual comprehensive physical examination, one of our veterinarians will assess your pet's age, breed and lifestyle to determine the risk for potential disease. After discussing your pet's needs, we will design a preventive wellness program and vaccination schedule.

### Senior Wellness:

Pets age much faster than people; by age 7 many pets are entering their senior years. We believe semi-annual veterinary examinations are essential for the early detection of health problems. These wellness exams can help diagnose, treat or ideally prevent illness before your pet

becomes symptomatic. They also provide an opportunity to discuss nutrition, behavior and other concerns regarding your senior

pet, so that they can live a longer, healthier and happier life.

## Diagnostics

### Extensive In-House Laboratory:

Our in-house laboratory gives us point-of-care diagnostic abilities when we're treating sick or injured pets. This allows us to properly evaluate every medical and surgical case.

### Progressive Anesthesia:

We take special care of all our surgical patients. A trained staff member is assigned the exclusive task of monitoring your pet during the procedure and providing post-surgical nursing and TLC. Patients have an intravenous catheter to administer medications and fluids.

Our monitoring allows us to closely watch the heart rate, respiration and oxygen saturation.

### Digital Radiography:

The addition of digital radiography, which produces the highest quality radiographs, allows our doctors to see fine detail and subtle changes.

**Pain Management:** We take pain control and management very seriously. Medications are dispensed for surgical and dental procedures as well as conditions requiring pain control.

**Blood Pressure Measurement:** Our Doppler monitor allows us to screen for high blood pressure. Early detection can delay damage to the heart and kidneys and

## Dentistry

Dental care for dogs and cats is an important part of their overall health program. Dental disease can lead to pain, tooth loss and bacterial infections. Periodontal disease can cause damage to the heart, lungs, liver and kidneys. More than 85% of dogs and cats over four years of age have some form of periodontal disease. A professional dental cleaning will not only give your pet a perfect smile, but will help ensure a longer and healthier life.
